## IMPRESSING POWER, NO WEIGHT

**An entire speaker system from ITEC has never been so light in weight before.** With less than 3 kg our so-called SMART-BOX is the ultimate lightweight in our mobile sound equipment portfolio. The new Neodym speaker technology with an exceptionally high efficiency factor offers new possibilities: Public addressing of up to 100 persons, talk time of 4 hours with only one battery charge. Manifold applications areas, flexibility and simplest operation are key features of this marvelous little device.

**With the handy carrying strap the Smart Box is always present.**

Whether on guided tours, trips, excursions, pilgrimages - whenever a group is in motion and good sound is required, the Smart-Box is the ideal travel companion. By using a wireless microphone, the entire system is completely cable-free.

Less than 3 kg in weight  
Very easy to carry

**Applicable for various applications like sport events at the green, children's parties or at retirement homes:** Simply place the smart box on a speaker stand and the entire sound equipment is built up and ready to use. A second microphone can be connected via a cable – Feeding of music by linking a CD or MP3 player (or of course a Smartphone) is possible as well.

## POWERFUL ACCESSORIES

### ITEC wireless microphones at your disposal

The built-in wireless microphone receiver (option) allows a wireless operation with different types of microphones.

hand-held microphone

Lavalier microphone

Headset microphone

The practical **hand-held microphone** is universally applicable, simple to use and can be passed on easily in case different speakers are active alternately. A shoulder strap (see accessories) also ensures that the speaker has both hands free.

When used indoors, e.g.: for lectures and courses, the **Lavalier microphone** is a good choice. The small microphone cartridge is virtually invisible when clipped to the collar or placket -The receiver, about a cigarette box big is attached to your pocket or belt.

The professional uses a **headset**. The microphone cartridge is always placed precise and concise in the distance from the mouth of the speaker. As with the lapel microphone the headset is connected with a small pocket transmitter, which can be carried in a pocket or belt.

The headset is also available with cable coupling for a direct connection to the Smart Box, e.g.: for guided tours, when the speaker carries the box himself.

### More accessories

#### Quiver

To store the speaker stand in case the Smart box is carried in heads up position

#### Speaker Stand

A lightweight 3-leg tripod allows setting up the Smart Box indoors and outdoors. Weight: about 1.7 kg, Maximum extension height: about 1.5 m. Other stand versions with larger floor space and height extension are available on request

#### Neck bracket for microphones

Practical neck bracket for handheld microphones. This bracket holds the microphone always in a consistent, comfortable distance from the mouth; the hands of the speaker remain free. A simple passing on of the microphone to other speakers is possible.
